c. Systems Engineering in Support of the New Building Communications Program: On 24 January 1984 the Agency Contract Review Board (ACRB) recommended Director of Logistics approval for the Agency to commence negotiations with Mitre Corporation, Bedford, Mass. in connection with the New Building communications facilities development. Mitre Corporation will be awarded, on a sole source basis, a contract for the program development concerning the architectural design, specification, procurement planning, development, installation and cutover of an integrated communications facilities environment for the new Headquarters building. This environment must support the relocation of the Agency's Headquarters Communications Center, provide interbuilding communications, enable access to external transmission facilities as well as meeting the new annex intra-building communications requirements. This proposed effort will run over a 12 month period at a cost in excess of \$550,000. [REDACTED]

d. AMCA Guard Service: AMCA Headquarters is experiencing problems in maintaining a reliable guard force for its facility. The current GSA contract which provides for these services expires 30 June 1984. [REDACTED] is working with Office of Communications (OC) and Office of Logistics Security Staff (OL/SS) in planning for direct procurement from a qualified contractor. [REDACTED]
